

FIRE TRUCK

Now combine the benefits of a TRUCKBOSS Truck Deck with an effective fire suppression system

APPLICATIONS

- Regional Fire Departments
- Wild Land Fire Fighting
- Corporate Fire Departments
- Agriculture Applications
- Rapid Intervention Units

FIRE TRUCK

THE SYSTEM

We are proud to introduce the TRUCKBOSS Fire Truck System.

It gives users the best of both worlds; to safely carry, load, and unload UTV's or ATV's, and have an effective class 6 or class 7 fire suppression system, all in one easy to use package

Compatible with all three quarter ton or 1 ton pick up trucks with a 6'5" or greater bed.

The most cost effective and unique solution in the market today!!!

With the tailgate closed all fire suppression equipment is out of view and safe in the dry and secure bed of the truck.

- Winch Loading
- Side Storage Boxes
- 150 US Gallon Tank
- Storage
- Pump Options in Specialty Engine Tray
- Reinforced SMARTBOXX with Lock Out Capability

FIRE TRUCK

FEATURES

★ The system incorporates a 150 US gallon baffled tank under the deck

Low Volume Fill Relief / Vent

High Volume Fill Relief / Vent

Tank Access Point (Filter Clean Out)

Level Indicator

High Volume Fill / Pump Access. W/ coarse filter in tank for pond fill applications. Valve. Standard 1.5 inch. Cam Lock.

Low Volume Fill w/ Valve (Standard Hose 3/4")

★ The mounting system works with a Double Railed TRUCKBOSS Base Deck to provide a universal fit into the bed of the truck. It serves as a cradle for the tank, a guide system for the SMARTBOXX, and a mount for two storage containers on either side of the tank.

Double Railed TRUCKBOSS Base Deck. The Double Rails provide additional storage volume Under the deck.

Tank Mount.

SMARTBOXX Guide.

Storage Containers.

FIRE TRUCK

FEATURES

- ★ The modified SMARTBOX serves to contain the pump, and provide additional dry and secure storage under the deck.

SMARTBOX houses the pump tray.

Additional storage. Dividers and tie down points can be added as required.

SMARTBOX is reinforced, for greater payload

SMARTBOX can be locked into position flush with the end of the tailgate. This allows the truck to be moved without having to close the tailgate

- ★ The pump tray provides a mounting point for the TRUCKBOSS recommended pumps. Prevents fuel and water from spilling into the gear loaded into the SMARTBOX.

Small Pump. Class 7. Waterax Mini Striker. 40USGPM @ 100PSI. Cam Locks

Large Pump. Class 6 pump Waterax Versax. 50USGPM @ 100PSI – 9 HP. 1.5" Cam Locks on main in/out. Two 1" Outlets with Valve (Backpack fill etc). Two 3/4" outlets for Foam Inductor System.

Pump tray with mounting point for pumps.

FIRE TRUCK

FEATURES

- ★ Optional outboard ramp hanging system is available for ATV or UTV hauling applications

Outboard ramp hanging system. Secured to Base Deck Sides. (Not compatible with the expanding deck) Ramp may be locked to the toe plate. (Lock Not included.)

Rear ramp lock down point with quick release

Front ramp lock down point with 2 knob release

- ★ TRUCKBOSS Winch System makes loading / unloading both easy and safe. LED lighting provides additional scene lighting. (both optional)

20" LED Light

Winch Loading System includes both wired and wireless controllers.
